GAS PIPELINE - TRANSCO  
236 Transco Road  
Mooresville, NC 28117

November 12, 2025

Dear Neighbor:

Williams Pipeline Transco is continuing through the preparation stages of the planned 2026 replacement of a section of Main Line B, as noted in the Survey Notification letter sent on June 27<sup>th</sup>. The project, which includes approximately 2.8 miles of Main Line B at four locations in Guilford County, has been moved up in schedule from July to February. As part of the process, Williams will have a Bid Show for potential contractors on November 18 and 19. You may see Williams employees and contractors as they make their way to each location. Some areas will be viewed from the road crossings, and some may be visited on foot.

The scheduled maintenance in your area will involve the replacement of approximately 1.89 miles of Main Line B from Moravian Church Road to the Haw River. The current line will be excavated, removed, and replaced. The new line will go back in the original Main Line B ditch.

John Gates, or Jeff Williams, will contact you in the coming weeks to provide a drawing of the work area and discuss the impact on your property. You may contact them at the number/email provided if you have questions.

Thank you.
